About the canon

A floating canon that thrives by itself. At least this is how it feels when it goes on. If it goes in a continuous flow it needs sharp impulses with drive. That's why the canon is written in a way that every phrase has a clear input in movement.

C Performance

All movements in the instructional videos are mirrored which means that, for instance, our left arm is your right arm. In the normal video it is the other way around. The singers on the video show how your singers should perform.
