

1 Look, read and match.

- A hologram
- B screen
- C headset
- D wi-fi password
- E mobile phone
- F laser
- G wire
- H plug
- I headphones
- J charger

2 Listen and write five things from Exercise 1.

A

B

C

D

E

3 Work with a friend. Ask and answer questions using words from Exercise 1.

Have you ever seen a hologram?

Yes, it was really cool.

Have you got any toys with a laser?

Yes, I've got a laser pointer.

4 How do you say the things in Exercise 1 in your language? Think, then check with a friend.

It was a bright spring day in the city. The buildings were tall and they shone in the sunlight. The streets were empty, but the sky was full of cars and taxis and trains. They flew quickly over the streets below. A yellow taxi landed outside a shiny glass building. A boy got out.

He was tall with blond hair and wraparound sunglasses. He walked up to the building, but there were no windows or doors.

‘Use your eyes!’

‘Tikto! Hey,’ he said.

His friend, Tikto, was getting out of another taxi. He was short and had long brown hair.

‘Hi Mark! Remember, use your eyes to unlock the door,’ the boy said.

Mark walked up to the building and stared at the glass wall. A blue light shone on his face. Then a door opened.

‘Cool. Now, remember the plan,’ Mark said.

‘Don’t worry, I know what we have to do,’ said Tikto. And they smiled at each other.

SPEAK

Describe the picture to a friend.

Binary code name bracelet

You need:

small beads in 3 colours

elastic

a pencil

sticky tape

scissors

1 Download the *Alphabet - Binary Translator* from **My Thinking Train** and find the letters of your first name in binary code.

2 Spell out your name in binary code on the *My Name in Binary Code* worksheet by colouring the correct squares for each letter.

3 Measure the elastic leaving enough for a knot at the end. Ask an adult to cut the elastic for you.

4 Stick one end of the elastic down and get the beads ready – one colour for the white boxes, another for the coloured boxes and the third colour to separate each letter.

5 Put the beads onto the elastic following the letters on the worksheet. Separate each letter with a bead of the third colour.

6 When you have finished your name, add beads of the third colour to fill the elastic then tie the two ends of the elastic together with 3-4 knots.

7 With 4 or 5 friends, take your bracelets off and jumble them up. Can you identify the bracelets by reading the names in binary code?
