6 What sea animals are you afraid of? Tell a friend.

Are you afraid
of jellyfish?

Yes, I am!

Humpback whales are very big. Adults can be 16 metres long and weigh up to 35,000 kilos! And even babies are very big.

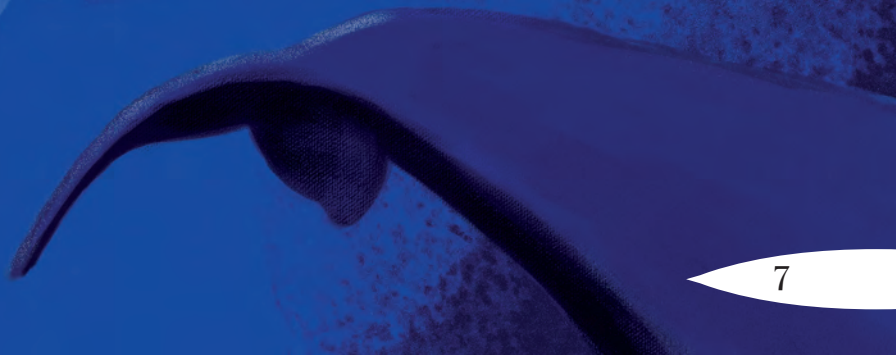

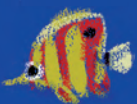

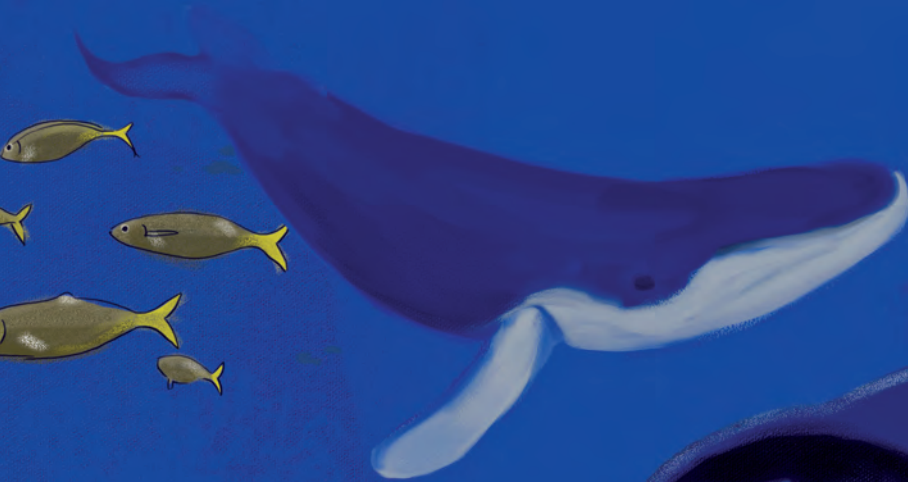

They swim long distances looking for food and warm seas. They often swim together in a group called a pod.

What are whales? Tick (✓).

- fish
- mammals
- reptiles

Play Station Project

Compass

Make a compass.

You need:

a sewing needle
(7-8 cm long)

a small magnet

a piece of cork

a small glass

a pair of scissors

(to cut the cork)

- 1 Move the magnet over the needle about 10 times. Always move it in the same direction. This way the needle becomes a magnet, too.

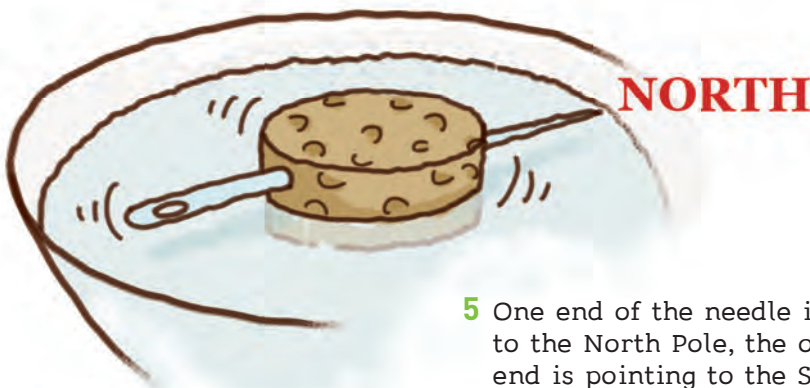

- 2 Cut a small piece of cork.

- 3 Ask an adult to push the needle through the cork. Stop when there is the same length of needle on each side.

- 4 Gently place the compass onto the water.

- 5 One end of the needle is pointing to the North Pole, the other end is pointing to the South Pole.
